-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Noiles (US Pat. No. 4,642,123). Noiles discloses the following of claim 11: an acetabular implant for hip prosthesis, comprising an insert (14) having a spherical internal cavity (32), and a hemispherical kernel (12) having an internal spherical cavity (21) adapted to cooperate with a femoral head (10) for universal movement of the femoral head within said internal cavity of said kernel, said hemispherical kernel having universal movement within said insert (col. 4, lines 7-13).

Noiles discloses the limitations of claim 14 as shown in Figures 1-4.

Claims 11, 12, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Marlow (US Pat. No. 5,989,294). Marlow discloses the following of claim 11: an acetabular implant for hip prosthesis, comprising an insert (11) having a spherical internal cavity (see Figure 1), and a hemispherical kernel (13) having an internal spherical cavity (23) adapted to cooperate with a femoral head (15) for universal movement of the femoral head within said internal cavity of said kernel, said hemispherical kernel having universal movement within said insert (see Figures 2-6; col. 2, lines 55-62; col. 4, lines 48-63).

Marlow discloses the hemispherical cup of claims 12 and 15 in element 10.

Art Unit: 3738

Marlow discloses the limitations of claim 14 as shown in Figures 2-6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Noiles in view of Subba Rao et al. (US Pub. No. 2001/0051831). Noiles discloses the invention substantially as claimed, however, Noiles probably does not disclose the hemispherical kernel being thinner at its central region than its peripheral regions. Subba Rao et al. teaches this thickness change in Figure 1 and paragraphs 0032-0047 for the purpose of better accommodating the other parts of the prosthesis. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have a hemispherical kernel thinner at its central region than its peripheral regions in order to better accommodate the other parts of the prosthesis.

Response to Arguments

Applicant's arguments with respect to claims 11-15 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
